PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience building and evaluating LLM-powered applications. Daily practitioner of prompt engineering, comparative AI response analysis, and structured conversational testing. Strong interest in emotional intelligence, behavioral dynamics, and multi-turn dialogue realism. Experienced in simulating diverse user personas to evaluate instruction-following, tone consistency, and reasoning robustness in AI systems.

English Proficiency: Advanced (C1-level, fluent written and spoken communication).

AI & CONVERSATIONAL EVALUATION EXPERIENCE

- Independent LLM Testing and Comparative Analysis

Conduct comparative evaluation of responses across multiple LLM platforms to assess reasoning depth, emotional sensitivity, and instruction adherence.

Design multi-turn conversational scenarios with varying emotional intensity and constraints to stress-test model consistency.

Experiment with adversarial prompting to expose hallucinations, contradictions, and tone shifts.

Analyze failure modes including misalignment with user intent and inconsistency under changing instructions.

PROJECTS

- AI Resume Analyzer (LLM-Integrated Web Application)

Built an LLM-powered resume evaluation system generating contextual feedback using React and Python backend.

Designed structured prompts to improve output specificity and reduce generic responses.

Evaluated response variability and analyzed scoring consistency across iterations.

- GoWheels – Bike Rental Platform

Developed a full-stack bike rental platform with booking and user management features using React and TypeScript.

Implemented dynamic availability logic and real-time state handling.

Integrated backend APIs for scalable and reliable data handling.

TECHNICAL SKILLS

AI & Evaluation: Prompt Engineering, LLM Output Analysis, Adversarial Testing, Failure Mode Identification, Multi-turn Dialogue Simulation

Programming: React, JavaScript, Python , Django, REST APIs

Tools: Git, GitHub

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science
[COER University] | Expected Graduation: [2028]
